Derick Wood's Publications

This list of Derick Wood's publications has been collected from several sources; the bibliographic data have been verified and corrected or completed whenever possible. Technical reports or similar internal publications are not listed if the results of these were also published elsewhere; to generate a complete list of Derick's technical reports would be a major task. Electronic addresses of publications are only provided when the only means by which to access such a work is the internet.

We thank Tom Neumann and Jasna Todorovic, former students of Helmut Jürgensen, for compiling the initial lists. We also thank Maia Hoeberechts, PhD student of Helmut Jürgensen, for her help with many aspects of the whole project including this bibliography.

As Derick's publications span a vast variety of fields, we could not rely on just a few obvious sources, like the *Mathematical Reviews,* the *Zentralblatt für Mathematik und ihre Grenzgebiete* or the database at `http://www.informatik.uni-trier.de/~ley/db/index.html`, but needed to search many other printed and electronic sources as well. The search was concluded in the end of August, 2009.

1. D. Wood: *On Generalised Interpretive Schemes for Programming Languages.* PhD thesis, Leeds University, 1968.
2. D. Wood: A note on top-down deterministic languages. *Nordisk Tidskr. Informationsbehandling (BIT)* **9** (1969), 387–399.
3. D. Wood: The theory of left factored languages. I. *Comput. J.* **12** (1969), 349–356.
4. D. Wood: A few more trouble spots in ALGOL 60. *Comm. ACM* **12**(5) (1969), 248.
5. D. Wood: A proof of Hamblin's algorithm for translation of arithmetic expressions from infix to postfix form. *Nordisk Tidskr. Informationsbehandling (BIT)* **9**(1) (1969), 59–68.
6. D. Wood: The normal form theorem – another proof. *Comput. J.* **12** (1969/1970), 139–147.
7. D. Wood: A generalised normal form theorem for context-free grammars. *Comput. J.* **13** (1970), 272–277. Erratum: **14** (1971), 326.

8. D. Wood: The theory of left factored languages. II. *Comput. J.* **13** (1970), 55–62.
9. D. Wood: Bibliography 23: Formal languages theory and automata theory. *Computing Reviews* **11**(7) (1970), 417–430.
10. D. Wood: Syntax-generated interpretation of programming languages. *Rev. Française Automat. Informat. Recherche Opérationelle* **4**(Sér. B-2) (1970), 71–89.
11. D. Wood: A further note on top-down deterministic languages. *Comput. J.* **14** (1971), 396–403.
12. D. Wood: Notes on formal language theory: First draft. Technical Report 71-CS-4, Department of Applied Mathematics, McMaster University, Hamilton, Ontario, Canada, 1971.
13. D. Wood: A factor theorem for subsets of a free monoid. *Inform. and Control* **21** (1972), 21–26.
14. R. D. Rosebrugh, D. Wood: A characterization theorem for n-parallel right linear languages. *J. Comput. System Sci.* **7** (1973), 579–582.
15. A. Walker, K. A. Redish, D. Wood: A simple binary tree display algorithm. Technical Report 73-CS-01, Department of Applied Mathematics, McMaster University, Hamilton, Ontario, Canada, 1973.
16. D. Wood: Bicolored digraph grammar systems. *Rev. Française Automat. Informat. Recherche Opérationnelle* **7**(Sér. R-1) (1973), 45–50.
17. D. Wood: A note on bicoloured digraph grammar systems. *Internat. J. Comput. Math.* **3** (1973), 301–308.
18. D. Wood: A note on table look-up. *Nordisk Tidskr. Informationsbehandling (BIT)* **13**(2) (1973), 245–246.
19. D. Wood: Properties of n-parallel finite state languages. *Utilitas Math.* **4** (1973), 103–113.
20. D. Wood: Some remarks on the KH algorithm for s-grammars. *Nordisk Tidskr. Informationsbehandling (BIT)* **13** (1973), 476–489.
21. G. Rozenberg, D. Wood: Generative models for parallel processes. *Comput. J.* **17** (1974), 344–348.
22. A. Walker, D. Wood: On bell trees, their implementation and properties. Technical Report 74-CS-4, Department of Applied Mathematics, McMaster University, Hamilton, Ontario, Canada, 1974.
23. D. Wood: Bounded parallelism and regular languages. In G. Rozenberg, A. Salomaa (editors): *L Systems. Lecture Notes in Computer Science* **15**, 292–301, Springer-Verlag, Berlin, 1974.

24. R. D. Rosebrugh, D. Wood: Image theorems for simple matrix languages and n-parallel languages. *Math. Systems Theory* **8**(2) (1974/75), 150–155.
25. R. D. Rosebrugh, D. Wood: Restricted parallelism and right linear grammars. *Utilitas Math.* **7** (1975), 151–186.
26. D. Wood: The design of compilers (Notes for A. M. 4E4/6E3). Lecture Notes 75/1, Department of Applied Mathematics, McMaster University, Hamilton, Ontario, Canada, 1975.
27. D. Wood: m-parallel n-right linear simple matrix languages. *Utilitas Math.* **8** (1975), 3–28.
28. D. Wood: A note on Lindenmayer systems, Szilard languages, spectra, and equivalence. *Internat. J. Comput. Information Sci.* **4** (1975), 53–62.
29. D. Wood: Time-delayed 0L languages and sequences. *Information Sci.* **8** (1975), 271–281.
30. G. Rozenberg, D. Wood: A note on K-iteration grammars. *Inform. Process. Lett.* **4**(6) (1975/76), 162–164.
31. G. Rozenberg, D. Wood: A note on a family of acceptors for some families of developmental languages. *Internat. J. Comput. Math.* **5**(4) (1975/76), 261–266.
32. J. van Leeuwen, D. Wood: A decomposition theorem for hyper-algebraic extensions of language families. *Theoret. Comput. Sci.* **1**(3) (1976), 199–214.
33. H. A. Maurer, D. Wood: On grammar forms with terminal context. *Acta Informat.* **6**(4) (1976), 397–402.
34. H. A. Maurer, D. Wood: Zur Manipulation von Zahlenmengen. *Angewandte Informatik* **7** (1976), 143–149.
35. H. A. Maurer, D. Wood: Szilard languages of L-systems. In A. Lindenmayer, G. Rozenberg (editors): *Automata, Languages, Development: At the Crossroads of Biology, Mathematics and Computer Science.* 251–261, North-Holland, Amsterdam, 1976.
36. A. Walker, D. Wood: Locally balanced binary trees. *Comput. J.* **19**(4) (1976), 322–325.
37. D. Wood: Iterated a-NGSM maps and Γ systems. *Inform. and Control* **32**(1) (1976), 1–26.
38. H. A. Maurer, A. Salomaa, D. Wood: E0L forms. *Acta Informat.* **8**(1) (1977), 75–96.
39. N. Solntseff, D. Wood: Pyramids: A data type for matrix representation in Pascal. *Nordisk Tidskr. Informationsbehandling (BIT)* **17**(3) (1977), 344–350.

40. D. Wood: Two variations on n-parellel finite state generators. *Comput. J.* **20**(1) (1977), 63–67.

41. D. Wood: Generalized time-delayed 0L languages. *Inform. Sci.* **12**(2) (1977), 151–155.

42. D. Wood: n-Linear simple matrix languages and n-parallel linear languages. *Rev. Roumaine Math. Pures Appl.* **22**(3) (1977), 403–412.

43. Th. Ottmann, D. Wood: Deletion in one-sided height balanced search trees. *Internat. J. Comput. Math.* **6**(4) (1977/78), 265–271.

44. K. Culik, II, D. Wood: Speed-varying 0L systems. *Inform. Sci.* **14**(2) (1978), 161–170.

45. H.-P. Kriegel, V. K. Vaishnavi, D. Wood: 2-3 brother trees. *Nordisk Tidskr. Informationsbehandling (BIT)* **18**(4) (1978), 425–435.

46. Y. S. Kwong, D. Wood: T-Trees: A variant of B-trees. Technical Report 78-CS-18, Department of Applied Mathematics, McMaster University, Hamilton, Ontario, Canada, 1978.

47. H. A. Maurer, A. Salomaa, D. Wood: ET0L forms. *J. Comput. System Sci.* **16**(3) (1978), 345–361.

48. H. A. Maurer, A. Salomaa, D. Wood: On good E0L forms. *SIAM J. Comput.* **7**(2) (1978), 158–166.

49. H. A. Maurer, A. Salomaa, D. Wood: Relative goodness of E0L forms. *RAIRO Inform. Théor.* **12**(4) (1978), 291–304.

50. H. A. Maurer, A. Salomaa, D. Wood: Uniform interpretations of L forms. *Inform. and Control* **36**(2) (1978), 157–173.
